

Resume for broker Carlos Kosloff

A little Bio

I grew up in Argentina in an English -speaking environment since my early childhood, even the kindergarten was English-speaking, so was the school I attended.

I traveled to Europe all alone and lived in France, Switzerland, and Italy, that is where I learned the languages.

Back to Argentina, I met my beautiful Korean wife Hae Kyung, who gave me two marvelous children.

I migrated to the United States with my family, and became an American citizen.

Languages spoken

English, French, Spanish, Italian.

Education

I graduated with maximum honors as an Associate in Science with a major in Computer Science from Broward College. I mention this because it is significant for my marketing system, which is based on spawning individual websites for properties, each on its own domain, with a wealth of meaningful information about the property. I am Equator and Resnet certified.

Real estate experience

After graduation as a licensed realtor I started out with Coldwell Banker and graduated from the Coldwell Banker University, because of the mortgage crisis of 2008 the office had to close, so I moved to Exit Realty, and finally to South Florida Real Estate Advisors, before creating my own firm Advanced Systems Realty LLC in December 2010.
